Subject: Residents Support Draft proposal # 4

Hello,

I am very supportive the strongest plan to protect our ocean. I understand that California is in the process of creating Marine Protected Areas along the North Central coast, from Half Moon Bay to Point Arena. These underwater state parks and reserves have the power to restore damaged habitats and let threatened species thrive. Please do whatever you can to make sure these underwater state parks and reserves are established, as soon as possible, and with an ambitious environmental protection plan.

Thank you for your efforts.

Sincerely,
Asia
